

BCG Team in Haiti

Business Contingency Group (BCG) conducted multiple projects in Haiti including setting up a Disaster Relief Warehouse (which increased the country's response capabilities), training Haiti's Emergency Management Staff on warehouse management, and a project that provided analysis for the modernization of Haiti's national emergency call center.

January 12th, 2014 marks the 4th anniversary of the catastrophic magnitude 7.0 earthquake that struck Haiti with an estimate death toll of 222,570 people. The following slide show provides a glimpse of the work done by BCG Field Teams over the years working in Haiti and the environment found on the ground

Environment

16 months after the earthquake, BCG staff could still see the impact from the earthquake

The Displaced Persons Camps

UN Peace Keepers

Disaster Relief Warehouse

BCG developed a fully functional Disaster Relief Warehouse by equipping the warehouse and training the Haiti's personnel on stocking, placing orders for restocking, maintaining the warehouse facility and equipment, implementing data management computer software, organizing existing materials, and establishing database inventories and management procedures to assist in the accountability and movement of disaster relief supplies.

This included the design and installation of a shelving/storage plan, procurement and installation of equipment (forklifts, computer system and warehouse management software, and office furniture), and training on managing a disaster relief warehouse.
